### **DETAILED ACTION**

Claims 1-8 are pending in this application.

#### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

#### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 4/28/05 and 10/10/05 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements have been considered by the examiner.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 1621

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over combined teachings of XP 002263256 and Thayumanavan.

XP'256 teaches formation of alkyl lithium compound starting from reacting alkyl halide with metal alkali, similar to claimed herein. The difference between the reference and herein claimed process is that the reference process does not go beyond, i.e., it does not teach deprotonation and formation of carbon to heteroatom bonding.

Thayumanavan, in his graduation thesis submitted in 1996, is expressly teaching deprotonation step and the carbon to hetero bonding linking. See pages 8-9 for deprotonation, scheme 11.

It would have been prima facie obvious to one of ordinary skill in the art at the time the invention was made to modify the process of XP'256 by extending the process and deprotonising, by forming carbon to hetero linking bond, as taught by Thayumanavan, because the latter reference is expressly teaching the step of deprotonization and formation of carbon to hetero atom linkage.
